

The graph shows the number of correct responses (y-axis, 0 to 10) across 320 trials (x-axis, Trials 1-320). The data is represented by a series of horizontal lines at y=0 and y=10, with occasional vertical spikes reaching y=9. The spikes are concentrated in the first 100 trials and then become more frequent, reaching a peak of 9 correct responses around trial 170.
